[Portfolio](#)

A Computer Engineering student (FUTA), detail-oriented Professional with 3+ years experience in Design and Product development, verified open-source builder in Steller, Base, Talent Protocol top 50, with 5+ wins in hackathons and build competitions. Seeking to contribute to Product growth, Market fit, Development and scaling.

## Experience

### Web3Nova · Intern Developer

2024–Present | Akure, Nigeria

- Building and shipping Web3 products at Nigeria's leading blockchain academy (500+ alumni, backed by Coinbase, Base, Polygon)
- Contributing to frontend and smart contract work across client and internal projects

### Paycrypt · Founder & Product Designer

2025–Present | Remote

- Founded a crypto-to-utility payment app — converts crypto to internet, electricity, and fiat with zero third-party dependency
- Designed full product UI; built as a Farcaster mini-app for decentralized social distribution

### Cliqi.bot · Frontend Developer

2026 | Remote

- Built production frontend for an AI-powered bot product in a fast-moving early-stage startup

### Walure Capital Kenya · UI/UX Designer

2025 | Remote

- Designed full UI for Walure's EdTech platform serving Kenyan users — live at [kenya.walurecapital.com](http://kenya.walurecapital.com)
- End-to-end ownership: research → Figma wireframes → high-fidelity prototype → developer handoff
